Abstract: This article provides information on the management of human consciousness today through manipulation, the pros and cons of manipulation, the types of manipulation that occur in human life, and the factors that lead to manipulation.

Keyword: Manipulation, type of manipulation, manipulative influence, manipulators, psychology

Modernized person, he can be a primary manipulator in any case. The number of manipulators is countless. We all are manipulators and we use various ways in order to reach our goals.

Current situations are the obvious version of manipulation. However, it is not about the manipulating individually, it is about effecting to nations and communities mind. People are being manipulated easily but the negative cultures and concepts which are quite apposite their real ones. Here the problem is; some people in community are unaware of the information they get, even they never consider about the data which it true or false. Accepting information is easier than evaluating, critical thinking. Those are the main part of supporting data. Modern manipulator never stops on anywhere but it always on the go, always getting better. It is curious about knowing human nature but more crucially its any aim is controlling people better than other minor influences. It is fact that people were not born as a manipulator but also as time passes he or she becomes manipulator gradually. Nowadays we don't pay attention manipulation since it's our one crucial part of our qualities life. They surrender us like sand but we never aware of them even we never think about them. The reality of the manipulation is that manipulator hides his own purpose. Many resources show that there are many examples of manipulation. One of the closest instances can be that the word "manipulation" co mes from lotion (maniples- a hand of, manus- a hand) which means controlling people in a nimble way. The complete description of manipulation is written in article by E.L.Dotsenko named "the psychological effect of manipulation concept". Manipulation is the one way of getting benefit by other people's actions in secret way. So, manipulation is considered as amyl affects to one and control one.

The process of manipulation consists of 2 opposite sides: the one who does manipulation- what is exact the subject and an object of manipulation. The subject of manipulation is also called manipulator. The object of manipulation is an individual or the mind of public. Some psychologists, particularly S.Kara Murza supports the idea of manipulation is the one way of Mass Media which is the tool that “brain wastes brain”, “psychic terror” and he agrees to west and American scientists opinion.

To operate manipulation mechanism people create artificial reality and at that moment Mass Media gives hand to manipulator. Here is the meaning is Mass Media gives ready conclusions as an information, as time passes these suggestions are swapped by people gradually. People who do actions and situations never feel old or eccentric while they are acting since they have already had the adaptation to those things voluntarily. It needs to be mentioned that, as a help of Mass Media manipulative concepts are being spread.

Psychological potential manipulation victims find thee several types of people. It consists of 5 kinds:

First type: this type people live safe and in harmony they are dominant with their logical and mental thinking. Those people are controlled with daily expanses.
Second type: this type of people make living with stress and anxiety, dominant in thinking, utopian, in safe but cautions, but they are good at risking.

Third type: This kind of people is more likely to think logically, prefers facts and characteristic and wants to explain all things in an intellectual way. These verses of people are honesty controlled by those feelings.

The fourth type: These types of people are described as an animal kind characteristic since they only live their lives for eating, sleeping and having sex. These people are very naïve they easily manipulated by their favorite habits.

The fifth kind: these are who has psychological disorder, mental problems and doesn’t know how to solve or accept problems. They are manipulated by threat or extreme pain. By surprise clarity, the manipulators choose their victim and control their mind.

Conclusion
Social life of community is effected by psychological processes and situations, emotions, feelings and also manipulations. As community develops, human instinct also improves. With the some way manipulative concepts are also progressing. The meaning of or life is that, modernized person loses the true way of controlling himself and thinking about his own future. Some of the manipulations can damage manipulators and their beloved ones. Some manipulations are really harmful that they hide person’s pain and suffering. Day by day people are being tricked by the manipulations. So we should be aware of the fact that information firstly should be analyses mentally rather than emotionally. We need to pay attention to every piece of date we get.
